- Setting up and adjusting equipment
- Visual inspection
- Welding of test coupons or samples for Certification
- Checking weld quality by using the technological bending test

The course provides for optional theoretical and practical DVS examination according to guidelines 2212. Material welded for the purpose of examination may be sent to Germany to the SKZ laboratory for destructive testing or tested onsite. While this course is beneficial for experienced welders as well as rookies to thermoplastic welding, the examinations are best attempted by more experienced participants.
